MP-I201

Masterpiece Integrated Amplifier

The MP-I201 is likely the single most extreme level of Integrated amplifiers.

The answer to your question is "why not".

During the introduction of the MP-S201 stereo/mono amplifier, many visitors were asking - "will this be available as an integrated amplifier" to which our founder replied - "why not". While this was most likely a funny remark - it wasn't from our founder, and so the development for a suitable preamplifier for the MP-S201 powerstages began.

Reusing the discrete modules found in the MP-L201 adding a suitable volume, it was possible to integrate this preamplifier board. While the MP-S/I-201 is the largest product we manufacture today, there is not as much free space as one would think.

The linestage offers in total five inputs, sensitivity settings between $2V_{RMS}$ and $8V_{RMS}$ to accommodate any source available and as always a true balanced configuration from input to output. Non balanced signals (via RCA) are immediately converted to true balanced signals at the very first stage of the preamplifier.

The final result is one - if not the - biggest integrated amplifier even made, with a sound so very far away from what one would ever expect from such a product. The powerhandling, the resolution, micro and macro details only suppressed by the MP-M201.

INPUT	XLR	RCA
Available	3	2
Sensitivity	2 & $8V_{RMS}$	2 & $8V_{RMS}$
Impedance	10K Ω	10K Ω

OUTPUT	Speaker L	Speaker R	
Available	1	1	
Impedance	75 m Ω	75 m Ω	
Power W (8/4 Ω)	700/1400	700/1400	Class AB
Power W (8/4 Ω)	25/50	25/50	Class A
Frequency response	+800kHz	+800kHz	
Signal to noise ratio	>130dB	> 130dB	
THD + noise	> 0,01%	> 0,01%	

VOLUME CONTROL	
Type	Relay controlled fixed resistor network
Gain	-81dB to +11dB

POWER CONSUMPTION	
Standby	<1W
Full Power	$550W_{RMS}$

DIMENSIONS	
Height	430 mm
Width	505 mm
Depth	708 mm
Weight	126 Kg
